

Diary Reminder-Avondale Lunch 19th September 2025

Hi all

This a reminder to put 19 th September in your diaries for the Avondale Lunch. As usual it will be held at the Avondale Golf Club.

This year our guest speaker will be Andrew Shute, who is Chief Corporate Development Officer of EBR Systems. EBR is an ASX listed company which has developed the first leadless pacemaker to treat heart failure. EBR uses its wireless technology to pace the left ventricle by means of a small implant the size of a grain of rice. Recently the device has received FDA approval which is an important development for the company.

Given our membership demographic I am sure this topic will be of interest to everyone. I look forward to seeing you there.

Phil Atkins
